About

OMS History

Federal energy policies throughout the 1990s increased regionalization of the electric industry through the advent of wholesale energy markets and development of Regional Transmission Organizations and Independent System Operators to facilitate fair and open access to the transmission grid. To address the increased workload of following these evolving issues, multi-state organizations of retail utility regulators called Regional State Committees (RSC) were formed to

pool the work and increase the influence of the state regulators.

The Organization of MISO States is an RSC that was formed in June of 2003 by the regulators from fourteen Midwestern states and the province of Manitoba that had member utilities in what was then named the Midwest Independent System Operator (MISO). As MISO's (later changed to Midcontinent Independent System Operator) membership changed, the makeup of OMS did as well. In December 2013, OMS welcomed its five newest members from the south to achieve its current construct when the Entergy Region joined MISO.

Email: kim@misostates.org

Kim Odom began work with the Organization of MISO States in September, 2016. Previously she was with Corporate Image/LBS for over 20 years as a Customer Service Assistant. There she performed a variety of clerical duties and database management. She provided comprehensive support for staff, vendors and customers.

Our mission

The purpose of the OMS is to coordinate regulatory oversight among the states, making recommendations to the Midcontinent Independent System Transmission Operator (MISO), the MISO Board of Directors, the FERC, other relevant government entities, and state commissions as appropriate; and intervening in proceedings before the FERC and in related judicial proceedings to express the positions of the OMS.
